Extinguishing Fears, Igniting Knowledge: SISC-RCY's Fire Safety Activity

The Southville International School and Colleges (SISC) - Red Cross Youth (RCY) Organization, in coordination with Ms. Jorge Balela and the SISC administration, successfully conducted a Fire Extinguisher Activity on February 17th at the College Parking Lot. This hands-on training engaged high school and senior high school volunteers, empowering them with essential fire safety knowledge and skills.

The activity addressed the critical need for fire safety awareness and preparedness. Recognizing that fires can occur unexpectedly, the SISC-RCY organized this training to equip students with the ability to respond effectively in such emergencies. The session focused on the proper usage of fire extinguishers, a crucial first line of defense in containing small fires and preventing them from spreading. Participants learned about different types of fire extinguishers, their appropriate applications, and the P.A.S.S. technique (Pull, Aim, Squeeze, Sweep) for effective operation.

The interactive nature of the activity allowed volunteers to practice using fire extinguishers under simulated fire scenarios, building their confidence and competence. This practical experience is invaluable in preparing them to react calmly and efficiently in real-life situations. The event was a resounding success, fostering a greater understanding of fire safety principles within the SISC community. The SISC-RCY extends its appreciation to Ms. Balela, the administration, and all the student volunteers who contributed to the success of this important initiative. This activity reflects SISC's commitment to creating a safe and prepared learning environment.
